

BRINGING A SEA OF CHANGE TO MARITIME CONNECTIVITY.

Maritime internet for commercial vessels.

Viasat[™] 

Unmatched. Unrivaled. Unbelievable.

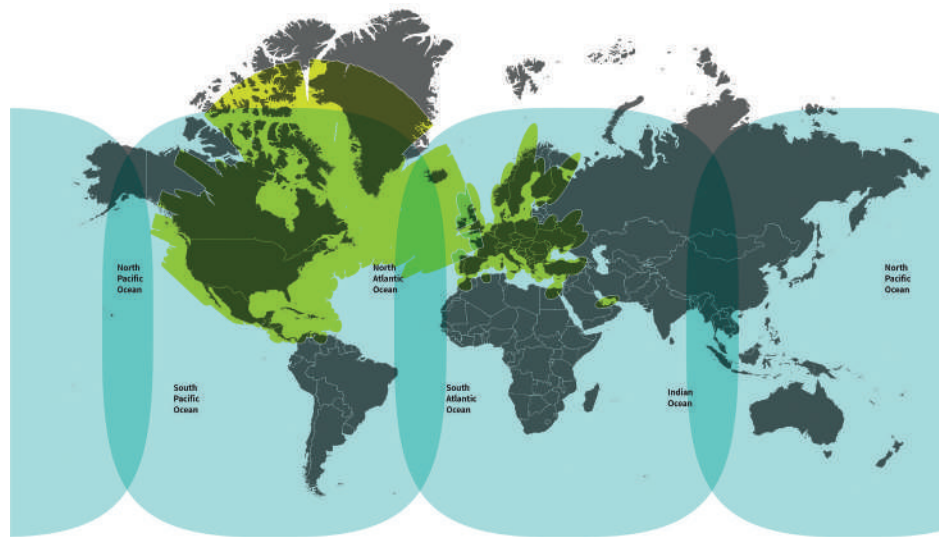

Best-in-class internet for commercial boats.

No other provider offers enhanced maritime connectivity like Viasat. Our game-changing technology delivers unparalleled bandwidth and no speed limits for superior internet experiences that keep your vessel connected and your operations running efficiently, while also allowing crew to stream, browse, and watch movies just as they would at home.

A better connection starts in the sky.

Regular connections typically stop working a few miles from shore, which can have a huge impact on ship operations and those on board. But with Viasat satellite connectivity, hard-to-reach maritime areas can now access data speeds that typically range up to 25 and 50 Mbps,* offering an experience similar to what you have at the office or at home.

And it's only going to get better. With the upcoming launch of the ViaSat-3 global constellation, high-speed broadband will be available to vessels anywhere on earth the seas can take you.

■ Current Ka Coverage

■ Upcoming Ka Coverage with ViaSat-3

*Speeds may still be limited by terminal equipment capabilities, network and environmental conditions, and other factors. Speeds are “up to,” are not guaranteed and will vary. Typical speeds range between 25 Mbps and 50 Mbps.

Landing high-speed internet.

Connecting to Viasat's high-capacity satellite network doesn't need to be complicated. With easy-to-install equipment that delivers more performance, reliability, and personalization, accessing the internet on board has never been easier.

Unprecedented internet experiences at sea.

With speeds greater than 25 Mbps, and peaks that can exceed 50 Mbps, your vessel gets superior internet for smoother operations and higher crew morale. Easily access high-performing connectivity with no capacity limits, so everyone can connect, even at the same time.

Email and messaging

Internet surfing and downloading

Video calls

Ship operation needs

Video streaming

Stay connected to stay productive.

Viasat's high-speed maritime internet keeps you connected to the mainland while you're at sea, so you can continue business as usual. Upload/download critical data, access onshore employees and information, and more. While you run your operations, your crew can stay connected with the people that matter most and access video streaming, increasing welfare and crew retention. So not only can your crew thrive, but so can your business.

Ready to connect to game-changing maritime internet?

With Viasat's choice of plans, you can manage costs while accessing only the features you want and need.
